**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-22 allowed.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method for analyzing optical properties including: applying a first modulation to at least a portion of a local oscillator signal; applying said local oscillator signal with said first modulation to a device under test; and optically mixing the received local oscillator signal with the first modulation with a second signal, in combination with the rest of the limitations of claim 1.

As to claim 10, the prior art of record, taken alone or in combination, fails to disclose or render obvious a system for analyzing optical properties including: a first optical signal modulator optically connected to modulate at least a portion of a local oscillator signal; a device under test interface in optical communication with said first modulator; and a system, in optical communication with said first optical signal modulator and said device under test interface, for receiving said local oscillator signal that is modulated and optically mixing said received local oscillator signal with a second signal, in combination with the rest of the limitations of claim 10.

As to claim 20, the prior art of record, taken alone or in combination, fails to disclose or render obvious a system for analyzing optical properties including: a first modulator optically connected to modulate at least a portion of a local oscillator signal; a device under test interface in optical communication with said first modulator; a second modulator optically connected to modulate at least a portion of said local oscillator signal; and an optical receiver in optical

communication with said first modulator, said device under test interface, and said second modulator, said receiver configured to receive and optically mix said local oscillator signal having first and second modulations, in combination with the rest of the limitations of claim 20.

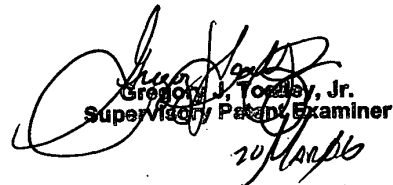

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
